## **Benedict Evans, 2015:**

In 1999, the peak of the film-camera industry, consumers took **around 80bn photos** (according to Kodak).

Hence, **at least 2 trillion photos** will be shared this year, and **possibly 3 trillion or more**.

That's just how many photos were shared, though.

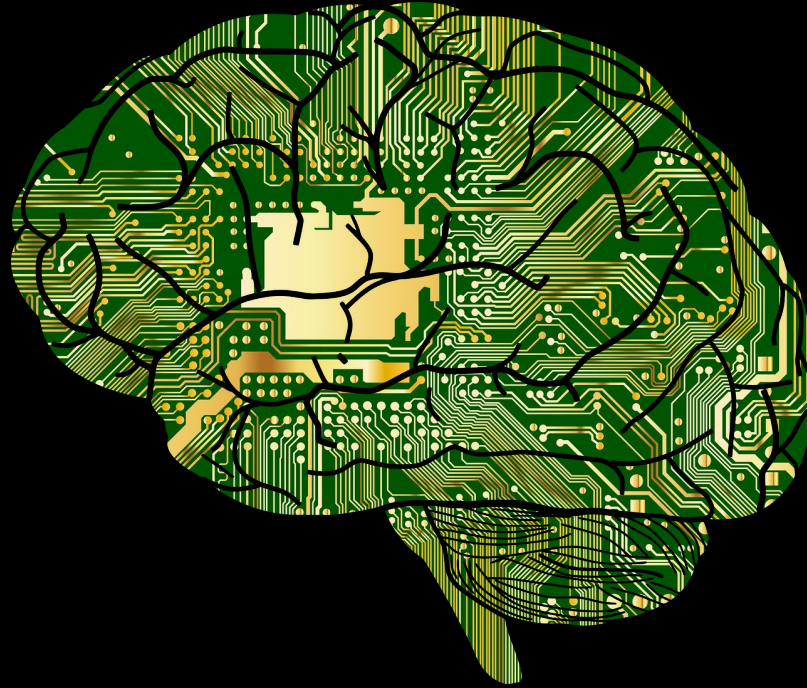

**How many more were taken and not shared?**

Meanwhile, estimates of the total number of photos ever taken on film range from **2.5-3.5 trillion**.
